Education

Kafrelsheikh University

Bachelor's Degree in Computer Science – Information Systems

Egypt

Aug 2020 – June 2024

Experience

Software Engineer

Jul 2025 – Present

@Bytes Maestros, Product-Based

Stockholm County, Sweden (Remote)

- Developed e-commerce platform and B2B SaaS restaurant management system using TypeScript, F#, and .NET 10 with Clean Architecture, Domain Driven Des.
- Built event-sourced systems with NATS JetStream and PostgreSQL event stores using CQRS, implementing event consumers for order management, product catalog, and marketing features.
- Developed SvelteKit frontends with TailwindCSS, Storybook, and comprehensive testing. Built RESTful APIs with Oxpecker following schema-first design and Functional Core Imperative Shell pattern.
- Designed PostgreSQL databases with Kysely, type-safe migrations, optimistic concurrency control, and multi-tenancy. Implemented observability-first architecture with distributed tracing.
- Skills:** C#, F#, TypeScript, .NET 10, SvelteKit, PostgreSQL, Kysely, NATS JetStream, Oxpecker, CQRS, Event Sourcing, DDD, TailwindCSS, Storybook, Docker, Vitest, Zod, Serilog

Backend Developer

Oct 2024 – Jun 2025

@Techno Island, Software House

Maadi, Cairo

- Developed 3 modules from scratch for the *E-Clinic* SaaS application.
- Developed 6 modules from scratch for the *NewLoanz* third-party banking CRM system.
- Worked on the Transactions Allocation background job and managed the Promises to Pay workflow.
- Integrated the *NewLoanz* API with internal and external jobs to process CSV files from the Core Banking System (CBS).
- Integrated an online API to retrieve daily currency exchange rates.
- Analyzed user stories, BRD documents, and Figma designs to gather requirements.
- Skills:** C#, ASP.NET Core, Entity Framework Core, Dapper, SQL Server, Hangfire, REST APIs, LINQ, Git, Docker

Backend Developer

Apr 2023 – Aug 2024

@Zellige, Product-Based Startup

Alexandria, Egypt

- Designed and developed over 45 features, delivering them to customers.
- Refactored and optimized the existing codebase, resolving bugs efficiently.
- Conducted end-to-end testing with front-end developers to ensure a seamless user experience.
- Skills:** C#, ASP.NET Core, Entity Framework Core, SQL Server, REST APIs, Git

Projects

Joyzy | Freelance Project 🌐

Oct 2025 – Feb 2026

- Built a full-stack e-commerce platform for a pet accessories brand with a bilingual (Arabic/English, RTL) storefront, cart, checkout, and order confirmation flow.
- Developed admin panel for products, categories, orders, marketing carousel, and delivery settings with sales analytics dashboard. *Technologies:* SvelteKit, PostgreSQL, Kysely, TailwindCSS, Better Auth, Paraglide, Storybook, Docker.

Custom Shell | Codecrafters Challenge 🐉

May 2025

- Developed a custom shell in C# with core built-in commands, external command support, directory navigation, and robust quoting.
- Implemented output/error redirection, command auto-completion, and modular components including state machine tokenizer and command executor.

Teams Maker | Graduation Project 🎓

June 2024

- Led a team of nine developers and developed a robust backend with ASP.NET Core, creating over 70 APIs for mobile and web clients.
- Designed comprehensive ERD with 20+ tables and analyzed client requirements. *Technologies:* ASP.NET 8, EF Core, SQL Server, Docker.
